The Professional Arborist's Choice

Field Tested and Proven Quality

At Jameson we listen to our customers – the people who use our products every day. For nearly 60 years, their feedback has been the basis for every new product and re-design.

Jameson tools are field tested to ensure real-time productivity and we back it up with a guarantee to perform.

That's why our tools are preferred by professional arborists, landscapers and line clearance teams.

Fiberglass Poles

The Leader In Fiberglass Poles Since 1956

Jameson introduced the first fiberglass lay-up sticks over 50 years ago to meet the needs of telecommunication linemen. The strength and durability of fiberglass proved indispensable when lifting leak detection equipment onto aerial cables and soon replaced wooden poles as the industry standard.

Since that time, Jameson's product line has expanded to include a variety of pole configurations, tools and accessories. Consequently, our customer base now extends to telecommunication and CATV linemen, professional arborists and landscapers.

By consistently providing the highest quality fiberglass poles, Jameson remains the professional's choice for line clearance and tree care.

All Jameson poles are manufactured with a non-fiberglass surface veil to prevent 'fiber blooming'.

Jameson's aircraft grade aluminum ferrules with exterior leaf spring locking button provide a secure connection and allow the use of different pole series together.

Fiberglass Poles

The Industry Standard For Over 50 Years

Less weight for greater control than JE Series Poles.

Exceptional bending strength.

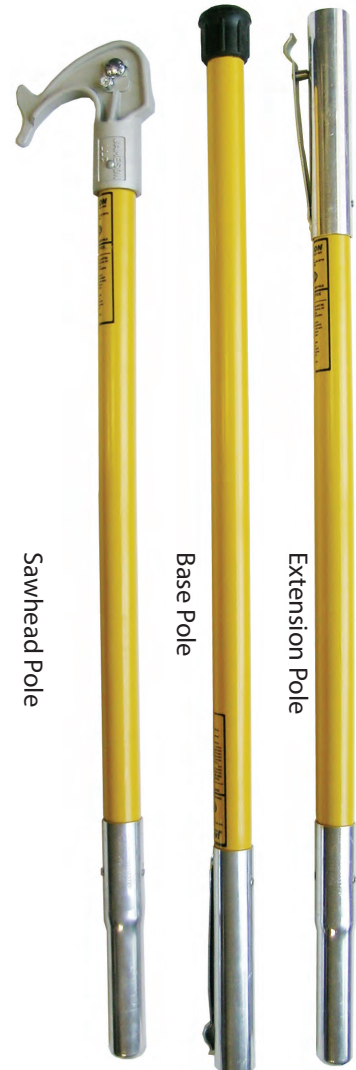

Protective surface veil prevents fibers blooming at surface due to abrasion or ultra-violet light.

Batch tested to 100KV per foot for five minutes.

Not a "hot stick."

Fiberglass Poles

Lightweight Powerhouse For Tree Trimming

Jameson's Thinnest Walled Pole.

Lighter weight, same heavy-duty control as FG Series.

Less fatigue during extended work periods and easier handling.

Durable, high gloss enamel coating for long life, easy cleaning, and prevention of fiber bloom.

Batch tested to 100KV per foot for five minutes.

Not a "hot stick."

Fiberglass Poles

Preferred for Line Clearance

Jameson's original foam core pole is the highest quality fiberglass pole available.

Foam core prevents debris and moisture build up inside pole; adds extra hoop strength and rigidity.

High visibility color.

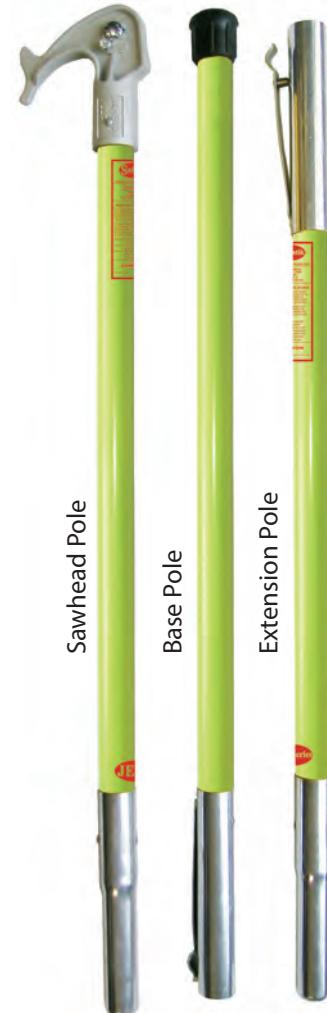

Protective surface veil prevents fibers blooming at surface level due to abrasion or UV light.

Meets requirements of OSHA Subpart V 1926.951(d)(1)(i): Every JE series pole is tested to 100KV per foot for five minutes.

Not a "hot stick."

Pole Adapters

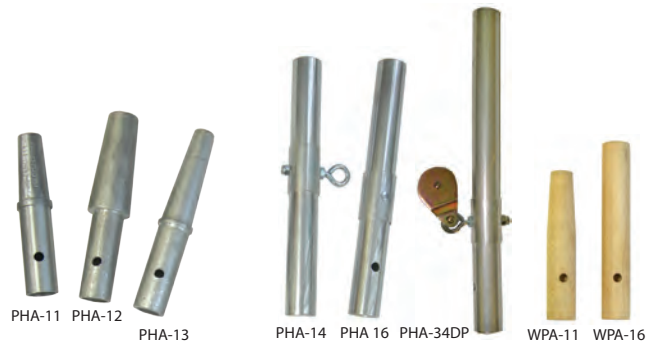

The Jameson Adapter System

Jameson's unique and versatile adapter system allows the use of different tool heads with the same pole, saving time and money.

The tool's adapter quickly snaps into the pole's ferrule and can be released without tools.

Adapters also allow the use of any manufacturer's accessories with Jameson poles.

Double Lock™ Telescoping Poles

The leader in fiberglass poles brings you a high quality, lightweight telescoping pole that saves space and adjusts to fit the job.

Double locks (internal lock and external cap) ensure poles will not collapse, offering a secure connection at any length for maximum versatility and safety.

An internal stop prevents pole separation when fully extended.

Not a “hot stick.”

Telescoping Pole with Female Ferrule
Use Pruner or Pole Saw with the same pole

Telescoping Pole with Adapter
Allows for permanent mounting of 1.25" i.d. sawhead section, pruner or ferrule.

Lightweight, durable fiberglass will not crimp under high stress like aluminum poles.

Pruners

JA-14 Professional Series Pruners

Jameson's heavy duty JA-14 Pruners were designed for the professional arborist. Forged steel construction for added strength, an enhanced spring for smoother cutting action and a raised leading edge on hook eliminates frictional drag. 1.25" side cut.

JA-14 S Swivel Pulley Pruner
Swivel provides versatility in pull direction and more leverage with less pressure on pulley arm
(Shown with Pole Adapter)

JA-14 DP Double Pulley Pruner
Double pulley allows for additional leverage and significantly reduces pulling force required
(Adapter Included)

JA-34 Big Mouth Pruners

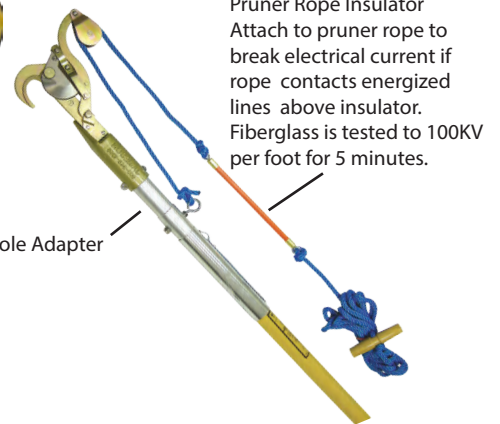

The new Big Mouth Pruner has the same heavy duty construction of the JA-14, but it has a larger cutting capacity of 1.75". It also features a removable upper spring pin and blade bolt for easy blade replacement and sharpening - no more drilling out pins to replace blade.

Saw Blades for Pole Saws and Hand Saws

Jameson's conventional 16" saw blades are an industry standard with CATV and telecommunication companies for line clearance. To meet the demands of professional arborists, Jameson introduced Barracuda™ Tri-Cut Saw Blades. Hard-chrome plated with impulse hardened teeth, tri-cut blades provide a quicker, cleaner cut with less wear on the blade than traditional blades.
