Titan Grip Wheel Lock is the culmination of advanced engineering and precision craftsmanship from TEAM Manufacturing. Produced in the United States with premium-grade carbon steel and tempered to the highest heat treating standards; Titan Grip Wheel Lock is "...American Made and American Tough". This exceptional level of quality far surpasses many competitor wheel locks commonly made with mild steel and no hardening process. This wheel immobilizer is a premium item without the premium cost. Titan Grip Wheel Lock is the answer in safeguarding your vehicle, trailer or equipment.

WEATHER RESISTANT

PROTECTIVE COATING PREVENTS SCRATCHING OF WHEELS

Quitting time at the jobsite means costly equipment left unattended overnight. Help reduce your loss and control your budget.

- < Carbon Steel rated 6 times stronger than standard "mild" steel
- < Stainless steel locking cylinder is drill resistant and freeze resistant
- < Strong up to 4,000 lbs

Remote areas are a danger-zone for trailers left unprotected. Titan Grip Wheel Lock's high visibility is a strong deterrent against theft.

The cost of a stolen trailer is high; replacement of the trailer, insurance premiums, registration fees and accessories. Titan Grip Wheel Lock is an economical investment against this avoidable loss.

Titan Grip Wheel Lock offers thousands of key combinations or keyed-alike for any individual or company's needs.

When you're far from home, safeguarding your mobility is priority number one. Having confidence that your vehicle is secure is invaluable.

TEAM Manufacturing has been producing American-made products for over 30 years. TEAM is committed to rapid quotations, efficient production and expedited shipping. We're ISO 9001:2000 certified, and obsessed with quality.
