

SMP-WM-1410-NC

Wire Counter / Measuring System

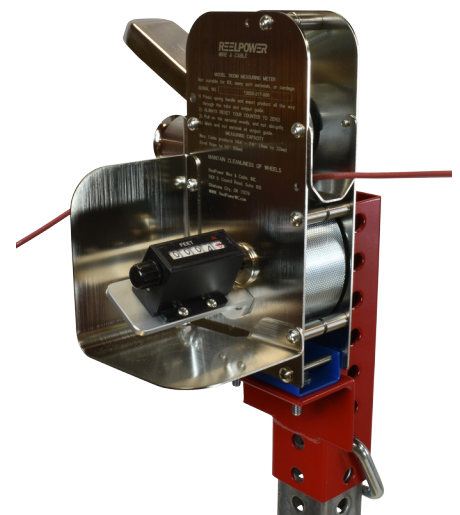

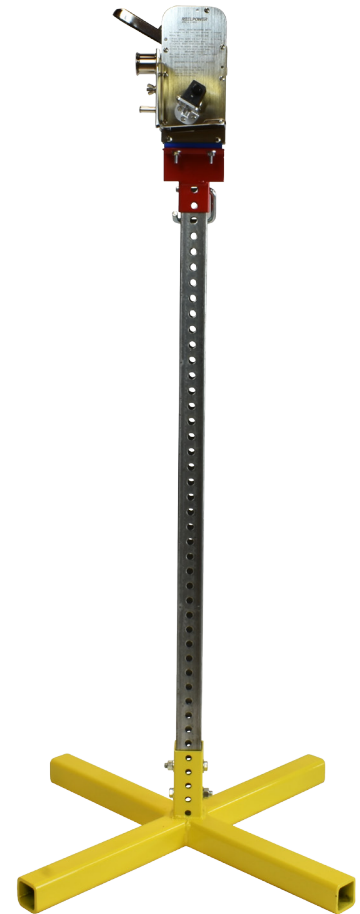

The SMP-WM-1410-NC wire measuring machine features a height adjustable, heavy-duty welded steel base with a telescopic upright section, and can accommodate a wide variety of flexible material from 1/64" to 7/8" diameter.

The wire counter adds or subtracts, and resets to zero with one turn of the reset knob. The interchangeable guide tubes with inner diameters of 1/4" and 1" afford accurate guiding of many hard-to-measure materials. Switching between the guide tubes is fast and easy and can be done without removing or replacing any parts.

Stainless and heat-treated steel is used for all shafts and surfaces subject to wear by material's passage, reducing the risk of damaging the material being measured. The SMP-WM-1410 Imperial counter can handle flexible material up to 9,999'-11" in a single cut before resetting, while the Metric counter indicates up to 999.9 Meters.

Features:

- Sold as one (1) SMP-WM-1410-NC system (wire sold separately)
- Measures flexible material from 1/64"-7/8" (0.4-24 mm) diameter
- Measures wire rope & stiffer materials up to 1/2" (13mm) diameter
- Guide tubes feature inside diameters of 1/4" & 1" (6.3 & 25 mm)
- Maximum measurable length: 999.9 meters (Metric Counter)
- Maximum measurable length: 9,999'-11" (Imperial Counter)
- Counter is not compatible with steel wire or armored cable (MC)
- Frames constructed of 10-gauge steel
- Outside dimensions: 44" H x 28" W x 28" D
- Product weight: 46 lbs.
- Conforms to Weights & Measures specifications in USA & Canada
- Made in the USA
