FEATURES:

- Pedestrian barricade forms a complete barrier to protect against unnecessary pedestrian accidents.
- This barrier is considered both Type I and Type II, meeting all OSHA requirements.
- Four panel barrier sets prevent pedestrian access at the top of escalators.
- Six panel barrier sets allow for ample work space in the escalator pit area at the base of escalator while effectively preventing pedestrian access.
- Modular design for multiple applications, any number of panels can be easily connected to form square, round, rectangular or linear structures.

General information is listed on the reverse side. The measurements provided are intended only as a source of information. They are given without guarantee and are not classified as a warranty. A specification will be sent to you upon request.
