vLoc3-MLA
MARKER LOCATOR ADAPTER

The **vLoc3-MLA (Marker Locator Adapter)** is designed for easy, fast and accurate location of buried EMS markers. Once located the MLA will give depth of cover to the buried marker (in dedicated marker locate mode) with the touch of a button.

The MLA attaches to the bottom of vLoc3-Pro, vLoc3-9800 and vLoc3-5000 receivers. When attached and plugged in to the receivers two marker related operating modes are enabled. In the dedicated marker mode, the receiver screens show a peak bar graph with the signal strength from the marker, the marker type and depth to the marker. In the dual marker mode all the above are shown in addition to the standard utility locate screen including left/right arrows and compass.

The plug-and-play MLA will detect any one of nine marker types, in good conditions, buried to a depth of 6’/2m and large flat markers to 9’/3m.

- Depth of cover readings to markers
- Plug-and-play automatic recognition by receiver
- Use when needed – no need for two devices
- Locates balls, disks, full range & near surface markers
- Use as dedicated marker locator or dual utility and marker locator

The MLA works with all vLoc3 series receivers

vLoc3-Pro  vLoc3-9800  vLoc3-5000

Simple clip-on and plug-in installation

Compatible Receivers

vLoc3-MLA Marker Locator Adapter Specifications

**Construction**
High impact ABS injection molded housing

**Weight & Dimensions**
1.76lbs (0.8kg), 8.2in(L) x 6.2in(W) x 4in(H) (208mm x 157mm x 102mm)

**Display**
Per vLoc3 series receiver showing:
- Response to marker balls
- Marker reference number and icon
- Circular bar graph and variable pitch tone to indicate signal strength

**Power**
Powered by the vLoc3 series receiver
